

LLM/AI Jobs Wrocław

Date: 2026-09-06 23:58 CEST Status: Material update

Podsumowanie

Dzisiejsza runda jest materialna. Just Join IT nadal pokazuje szeroki board AI/ML dla Wrocławia z 134 ofertami i dołożył świeży tail wokół agentic, platform i LLM work. Pracuj.pl odświeżył board o role z evaluation, agentic systems i AI automation, Comarch potwierdził żywy canonical DevOps Engineer (AI-native Stack) oraz Full-stack Developer (Agentic AI), a EPAM dodał Senior AI-Native Engineer, Senior AI & Agentic Systems Engineer (Java) i Senior .NET Engineer with AI z Wrocławiem w zasięgu hybrydy.

Zakres sprawdzony

- Just Join IT: Job offers AI/ML Wrocław
- Pracuj.pl: Praca ai, Wrocław
- Comarch: DevOps Engineer (AI-native Stack)
- Comarch: Senior pages
- EPAM: Senior AI-Native Engineer
- EPAM: Senior AI & Agentic Systems Engineer (Java)
- EPAM: Senior .NET Engineer with AI

Najciekawsze nowe lub materialnie zmienione role

1. Just Join IT - AI Agent Middle/Senior Developer

- Lokalizacja/remote: Wrocław / remote
- Fit LLM/AI: Python, RAG, CRAG, GraphRAG, LangChain, LangGraph, CrewAI i agentic tools.
- Dlaczego interesujące: To świeży board signal, który bardzo jasno siedzi w agentic retrieval i orchestration.
- Niepewność: Brak publicznego wynagrodzenia i pełnej kanoniczności employer page.
- Source: Just Join IT: Job offers AI/ML Wrocław

2. Just Join IT - Senior AI Platform Engineer

- Lokalizacja/remote: Wrocław / remote
- Fit LLM/AI: Large Language Models, Agentic Evaluation, LLMOps, CI/CD, AWS i vector databases.
- Dlaczego interesujące: To mocny sygnał produkcyjnej platformy pod LLM i ewaluację agentów.
- Niepewność: Salary is undisclosed and the board card may keep drifting.
- Source: Just Join IT: Job offers AI/ML Wrocław

3. Pracuj.pl - Senior Data Scientist – AI/LLM Evaluation

- Lokalizacja/remote: remote Poland
- Fit LLM/AI: AI/LLM evaluation.
- Dlaczego interesujące: Eval staje się coraz bardziej osobną kategorią na publicznych boardach.
- Niepewność: Employer page remains board-first in the current view.
- Source: Pracuj.pl: Praca ai, Wrocław

4. Pracuj.pl - AI Engineer (Python, LLMs)

- Lokalizacja/remote: remote Poland / Wrocław employer footprint
- Fit LLM/AI: Python, LLMs, GenAI.
- Dlaczego interesujące: Silny, praktyczny sygnał hands-on LLM engineering z publiczną stawką.
- Niepewność: Board wording can still drift and the canonical page may change.
- Wynagrodzenie: 12 600 - 19 320 zł / mies. (zależnie od umowy)
- Source: Pracuj.pl: Praca ai, Wrocław

5. Pracuj.pl - Backend Engineer, AI Agent Systems

- Lokalizacja/remote: remote Poland
- Fit LLM/AI: AI agent systems.
- Dlaczego interesujące: To nowy, explicit agentic systems lead z ciężarem backendowym.
- Niepewność: Employer page is still a public board card rather than a clearly canonical detail page.
- Source: Pracuj.pl: Praca ai, Wrocław

6. Comarch - DevOps Engineer (AI-native Stack)

- Lokalizacja/remote: Wrocław
- Fit LLM/AI: AI-native architecture, AIOps, cloud and operational tooling.
- Dlaczego interesujące: Canonical page stays live and still anchors the more infra-heavy side of the topic.
- Niepewność: The role is broad and can skew toward platform engineering rather than pure LLM work.
- Source: Comarch: DevOps Engineer (AI-native Stack)

7. Comarch - Full-stack Developer (Agentic AI)

- Lokalizacja/remote: Wrocław plus multiple other locations
- Fit LLM/AI: Agentic AI.
- Dlaczego interesujące: This is a new canonical agentic-family signal on the Comarch seniors page.
- Niepewność: The seniors listing is broad, so the final day-to-day scope may be less AI-heavy than the title suggests.
- Source: Comarch: Senior pages

8. EPAM - Senior AI-Native Engineer / Senior AI & Agentic Systems Engineer (Java)

- Lokalizacja/remote: Wrocław hybrid
- Fit LLM/AI: AI-native applications, agents, LLM-powered components and Java/Spring Boot delivery.
- Dlaczego interesujące: EPAM now has a cleaner canonical cluster around AI-native and agentic systems with Wrocław in scope.
- Niepewność: Titles are adjacent enough that future deduplication may be needed if one disappears or gets renamed.
- Source: EPAM: Senior AI-Native Engineer
- Source: EPAM: Senior AI & Agentic Systems Engineer (Java)

9. EPAM - Senior .NET Engineer with AI

- Lokalizacja/remote: Wrocław hybrid
- Fit LLM/AI: AI-adjacent platform modernization, cloud, automation and delivery.
- Dlaczego interesujące: Not a pure LLM role, but it is a useful proxy for broader AI-enabled platform work at EPAM.
- Niepewność: The AI component may be lighter than the title implies.
- Source: EPAM: Senior .NET Engineer with AI

Zmiany od poprzedniej rundy

- Just Join IT remained a large Wrocław AI/ML board, but the current surface now emphasizes agentic systems, platform evaluation and LLM infra more clearly than last run.
- Pracuj.pl surfaced a stronger evaluation and agentic backend tail, including Senior Data Scientist – AI/LLM Evaluation, AI Engineer (Python, LLMs) and Backend Engineer, AI Agent Systems.
- Comarch's canonical AI-native page stayed live, and the seniors page now exposes Full-stack Developer (Agentic AI) as an additional public family member.
- EPAM added or re-surfaced a stronger Wrocław-hybrid canonical cluster around Senior AI-Native Engineer, Senior AI & Agentic Systems Engineer (Java) and Senior .NET Engineer with AI.

Ryzyka i niepewności

- Board-first offers can change title, salary or status quickly, so today's wording should be treated as a short-lived snapshot.
- Some of the new roles are more platform, backend or evaluation-oriented than pure LLM engineering.
- Full-stack Developer (Agentic AI) is public on Comarch's seniors page, but its actual AI depth may be narrower than the title suggests.

Rekomendowane akcje

- Re-check the fresh Just Join IT, Pracuj.pl, Comarch and EPAM cards next run for expiry, salary drift and canonical-page emergence.
- Watch whether Comarch's agentic family stays live and whether the new public Full-stack Developer (Agentic AI) keeps Wrocław wording.
- Keep EPAM on the recurring shortlist because the new Wrocław-hybrid AI-native roles look stable enough to be worth repeated validation.
